

Tuesday 19th May

Today we woke up and sat in our beds till our teachers told us we could get up. Once our teachers told us we could get up out of bed we went and brushed our teeth and got dressed. When we were dressed we were told to stay in our dorms till the rest of the camp woke up.

When everyone had woke up we went and had breakfast. Today breakfast was sausage, waffles, beans and toast. Once we had had breakfast we went and met in the conference room. We found out we would be doing problem solving witch included wall climbing, river crossing, night line and Archery. We went where the wall climbing was and put on our harnesses. Once we had our harnesses on they were checked by the instructors. Then we started to climb the wall we had to touch the top of the wall to succeed. Once we touched the top we had to lean back and walk down the wall. Then when we at the bottom of the wall we unclipped the harnesses.

Once our harnesses were unclipped we walked to the river crossing. At the river crossing we put on helmets and clipped on our harnesses. When the instructor on the other end was ready they pulled 1 person across at a time. Once you were across you took your harness of and they were pulled across the river. That was continued until everyone was across.

Our next activity was the night line. For that we needed a helmet and a blindfold. We placed the helmet and blindfold on and were told to line up on the rope. As soon as we were lined up on the rope we were told to hold on to the hood of the person in front of us. When we had hold of the hood we had to walk round the course that had been made for us. After that we took our helmet and blind fold off.

Our next and final problem solving activity was archery. For archery we had to get a bow. Lower it so it is horizontal. Then you place a arrow in the bow and pull back the string. Finally release the string and the arrow will fire.

After we finished problem solving we went and had lunch. For lunch today we had chicken dinosaurs and chips.

Once we had finished dinner we had free time. During free time we had time to get our things together for the nature trail. After free time we did the nature trail. The nature trail is a walk round the dale and you have to answer questions about trees, plants and other types of nature. For the nature trail we were set into our normal groups. We answered questions like what type of tree is this and what is the most popular tree in this area.

When we finished the nature trail he went into the lunch hall and wrote all the answers on a new sheet of paper in neat. While we were writing we had a biscuit and a drink of juice. As soon as everyone was back we went and had free time but some people helped set up the tables.

For tea that night we had curry and rice and fish fingers and chips. For desert we had arctic roll and ice cream. As soon as we had finished lunch we had more free time and

some time to change into our things for entertainment. While we were having free time we had our dormitory tidy inspection.

When we had finished the dormitory inspection we went to the conference room for the entertainment. That night we had a Chinese dance by Tom, Tom, Ollie and Kalem. and that night we were told the winner of the dormitory tidy competition and the winner was Mr. A's dormitory! When the entertainment was over we went to our dorms and got ready for bed. when we were ready for bed we got into bed and went to sleep.
